ABHINAV ALLANI

Aspiring Data Scientist | Business Analytics & Applied AI

Aurora, IL • (740) 272-6394 • abhinavallani02@gmail.com

linkedin.com/in/abhinav-allani-1a9207389 • portfolio.abhinavallani02.workers.dev/

PROFILE

High school junior interested in data science, business analytics, statistics, and applied AI. Founder of an educational technology platform and co-founder of a student wellness initiative, with experience in Python, JavaScript, web development, technical projects, and peer tutoring. Seeking research, summer program, and eligible internship opportunities.

EDUCATION

Metea Valley High School | Aurora, Illinois | Expected graduation: May 2028

Reported GPA: 3.7 weighted / 3.6 unweighted • AP Computer Science A (in progress)

TECHNICAL SKILLS

Programming & Web: Python, JavaScript, Java (coursework), HTML, CSS, responsive web development

Analytics & AI: Statistics for data science, machine learning concepts, image recognition, reinforcement learning, generative AI

Tools: Cloudflare Pages, Google Analytics 4, n8n, NVIDIA Nemotron

PROJECTS & LEADERSHIP

Founder & Developer — Choose & Rise / *Jan 2026–Present*

- **Educational platform:** Founded a student-focused site helping high school students explore colleges, majors, and career pathways.
- **Development:** Built and maintained a responsive HTML/CSS/JavaScript application deployed on Cloudflare Pages; worked with educational data sources.

Co-founder — SilentHelp / *2026–Present*

- **Applied AI initiative:** Contributing to a student-focused digital wellness platform exploring behavioral signals, NLP, and pathways to human support.
- **Product collaboration:** Work across product planning, development, and outreach, with attention to user privacy and safety.

MetricFlow — Retail Analytics Platform / *In development*

- **Current build:** Developing a Python, SQL, React, and FastAPI application to explore retail sales trends, product performance, and customer purchasing patterns using historical transaction data.

SELECTED TECHNICAL PROJECTS

- **Plant Disease Detector:** Built an image-based machine learning classifier for plant leaf disease recognition.
- **Personal Diet Tracker:** Developed a photo-based meal analysis tool for estimated nutrition information.
- **Social Media Automation:** Built an n8n workflow using NVIDIA Nemotron for AI-assisted content generation and automation.

RESEARCH & COMMUNITY EXPERIENCE

High School Researcher — Pulse Research Program / *2026–Present*

Participating in mentor-guided AI/ML research. Specific experiments and outcomes to be added after verification.

ELL Math & Science Tutor — Metea Valley High School / *2025–Present*

Help students with mathematics and science concepts, homework explanations, and problem-solving; earned ELL Tutoring Certification.

Community Volunteer / *2025–Present*

Participated in school and community service initiatives; 8+ service hours reported.

ACTIVITIES & CERTIFICATIONS

Activities: Student Government, STEM Talks, Computer Club, Cricket Club, Key Club, UNICEF

Certifications / coursework: Reinforcement Learning (Grade A); Python Programming Expert; Python Statistics for Data Science (Grade A); Generative AI Industry Applications; ELL Tutoring Certification; Student Government Participation
